Index to Volume 36

AUTHOR INDEX

Abner, C. H.
Design and performance of an exposure system for measuring the response of crops to acid rain and gaseous pollutants in the field, 894

Albano, R. K.
Laboratory measurements of the spatial distribution of gas velocities through seasoned baghouse fabrics throughout a simulated filtration cycle, 34

Allen, C. C.
Field evaluation of hazardous waste pretreatment as an air pollution control technique, 1264

Allen, R. J.
Air pollution emissions from the incineration of hospital waste, 829

Amundson, R. G.
Acid rain and ozone influence mycorrhizal infection in tree seedlings, 724

Anderson, K. R.
Respiratory responses of exercising asthmatic volunteers exposed to sulfuric acid aerosol, 1323

Aneja, V. P.
Dry deposition of ammonia at environmental concentrations on selected plant species, 1338

Anlauf, K. G.
Characterization of several integrative sampling methods for nitric acid, sulphur dioxide and atmospheric particles, 715

Armentano, T. V.
Fog chemistry in an urban midwestern site, 1359

Avol, E. L.
Respiratory responses of exercising asthmatic volunteers exposed to sulfuric acid aerosol, 1323

Bailey, E. M.
Modeling the effect of ethanol/gasoline blend usage on ozone formation in urban areas, 808

Barber, W. C.
Avoiding and managing environmental damage from major industrial accidents: executive summary of the international conference, 127

Barr, E. B.
Generation, behavior, and toxicity of ammonium sulfite aerosols, 55

Barr, M. R.
Report on the Fourteenth APCA Government Affairs Seminar. Clear Air Act—when, how, and what, 685

Baumgardner, D.
Single-stage dewatering of FGD waste. Emerging technology at Plains-Escalante Station, 852

Becker, S. W.
The air administrators, 122

Bedi, J. F.
Effects of peroxyacetyl nitrate alone and in combination with ozone in healthy young women, 265

Biersteker, K.
Decline in children's pulmonary function during an air pollution episode, 1223

Billick, I. H.
Effects of operational factors on pollutant emission rates from residential gas appliances, 1233

Blaney, B. L.
Field evaluation of hazardous waste pretreatment as an air pollution control technique, 1264
Treatment technologies for hazardous wastes: Part II. Alternative techniques for managing solvent wastes, 275

Bond, A. E.
Intercomparison of high-volume PM_{10} samplers at a site with high particulate concentrations, 917

Bozzelli, J. W.
Quality control for noncriteria air pollutants: results from the ATEOS project, 388

Brant, G.
Field evaluation of hazardous waste pretreatment as an air pollution control technique, 1264

Brennan, E.
TE effects division environmental report, 331, 1093

Brenniman, G. R.
Air poilution emissions from the incineration of hospital waste, 829

Brna, T. G.
Thiosulfate as an oxidation inhibitor in flue gas desulfurization processes: a review of R&D results, 1138

Brunekreef, B.
Decline in children's pulmonary function during an air pollution episode, 1223

Burmann, F. J.
Automated data-logging personal exposure monitors for carbon monoxide, 883

Burnet, P. G.
Particulate, carbon monoxide, and acid emission factors for residential wood burning stoves, 1012

Butler, F. E.
Chromium analysis at a ferrochrome smelter, a chemical plant and a refractory brick plant, 581

Buttazzoni, C.
Probability model for atmospheric sulphur dioxide concentrations in the area of Venice, 1028
Statistical study of air pollutant concentrations via generalized gamma distributions, 1250

Byrne, D. M.
Development of federal air standards to reduce sulfur dioxide emissions from new industrial boilers, 888

Cannon, J. A.
The regulation of toxic air pollutants: a critical review, 562
The regulation of toxic air pollutants: critical review discussion papers, 986

Carr, R. C.
Integrated environmental control in the electric utility industry, 652
Third Conference on Fabric Filter Technology for Coal-Fired Power Plants, 763
1985 update, operating history and current status of fabric filters in the utility industry, 100

Carter, B. H.
Fog chemistry in an urban midwestern site, 1359

Chang, D. P. Y.
Relationships among coefficient of haze, scattering coefficient, and visibility during an agricultural burn season, 173

Chang, J. C. S.
Thiosulfate as an oxidation inhibitor in flue gas desulfurization processes: a review of R&D results, 1138

Chant, D. A.
Avoiding and managing environmental damage from major industrial accidents: executive summary of the international conference, 127

Chappelka, A. H.
Direct effects of atmospheric sulfate deposition on vegetation, 813

Cheney, J. L.
Profiles of organic particulate emissions from air pollution sources: status and needs for receptor source apportionment modeling, 17

Chevone, B. I.
Direct effects of atmospheric sulfate deposition on vegetation, 813

Chinkin, L. R.
Relationships among coefficient of haze, scattering coefficient, and visibility during an agricultural burn season, 173

Cleary, A. C.
1-Nitropyrene in used diesel engine oil, 1255

Cohen, J.
EPRI newsletter, 364, 880, 1220

Collom, R. H., Jr.
Report on the Fourteenth APCA Government Affairs Seminar. Clear Air Act—when, how, and what, 685

Colome, S. D.
TE effects division environmental report, 1178

Conner, W. D.
Remote measurement of sulfur dioxide emissions using an ultraviolet light sensitive video system, 42

Corbett, H. J.
Environmental progress and problems: a chemical industry perspective, 1003

Core, J. E.
Automated chemical mass balance receptor modeling, 1026

Cota, H. M.
Source testing software, 1269
Telecommunications and the microcomputer, 743
Telecommunications and the microcomputer—II, 833

Crutcher, H. L.
Application of cluster analysis to aerometric data, 1116

Cundy, V. A.
Practical incinerator implications from a fundamental flat flame study of dichloromethane combustion, 824

Dahl, A. R.
Generation, behavior, and toxicity of ammonium sulfite aerosols, 55

Daisey, J. M.
Profiles of organic particulate emissions from air pollution sources: status and needs for receptor source apportionment modeling, 17
Quality control for noncriteria air pollutants: results from the ATEOS project, 388

Darack, F.
Quality control for noncriteria air pollutants: results from the ATEOS project, 388

Darling, C.
Air pollution emissions from the incineration of hospital waste, 829

Dassen, W.
Decline in children's pulmonary function during an air pollution episode, 1223

Davidson, A.
Comment on "Ten-year ozone trends in California and Texas" (with author's reply), 597

Davis, D. D.
Severity of SO_2-induced leaf necrosis on Caribbean, Scots, and Virginia pine seedlings, 1019

Davis, M. L.
A survey of graduate education in hazardous waste management, 1036
de Groot, H.
Decline in children's pulmonary function during an air pollution episode, 1223
Dellinger, B.
The viability of using surrogate compounds for monitoring the effectiveness of incineration systems, 179
Del Turco, A.
Probability model for atmospheric sulphur dioxide concentrations in the area of Venice, 1028
de Nevers, N.
Daily dispatching of natural gas for air quality, 272
Drago, R. J.
Automated data-logging personal exposure monitors for carbon monoxide, 883
Dravnieks, A.
Odor thresholds by forced-choice dynamic triangle olfactometry: reproducibility and methods of calculation, 900
Drechsler-Parks, D. M.
Effects of peroxyacetyl nitrate alone and in combination with ozone in healthy young women, 265
Duncan, K.
Improving baghouse performance at the Monticello generating station, 1075
Dunmore, J.
International news, 10, 491, 976
Dunwoody, C. L.
Rapid nitrate loss from PM_{10} filters, 817
Durham, J. L.
A transition-flow reactor tube for measuring trace gas concentrations, 1228
Dzubay, T. G.
Characteristics of individual particles at a rural site in the Eastern United States, 906
Edmisten, N. G.
Particulate, carbon monoxide, and acid emission factors for residential wood burning stoves, 1012
Egami, R. T.
A method for propagating measurement uncertainties through dispersion models, 246
Ehreth, D. J.
The risk assessment process, 787
Eldridge, K.
Historic emissions of sulfur and nitrogen oxides in the United States from 1900 to 1980, 139
Ellestad, T. G.
A transition-flow reactor tube for measuring trace gas concentrations, 1228
Emison, G. A.
Report on the Fourteenth APCA Government Affairs Seminar. Clear Air Act—when, how, and what, 685
Esche, M.
Stackless power plant with flue gas desulfurization, 658
Eskinazi, D.
Retrofit NO_x control options for coal-fired electric utility power plants, 1294
Fairbairn, B.
Application of cluster analysis to aerometric data, 1116
Fay, J. A.
Seasonal, episodic and targeted control of sulfate deposition, 798
Feldman, R. D.
Captive insurance companies and the management of environmental risks, 791
Feldman, S. L.
Emissions trading and acid deposition control: the need for ERC leasing, 574
Felix, L. G.
Improving baghouse performance at the Monticello generating station, 1075
Fellin, P.
Characterization of several integrative sampling methods for nitric acid, sulphur dioxide and atmospheric particles, 715
Ferman, M. A.
Measurements of sulfur oxides, nitrogen oxides, haze and fine particles at a rural site on the Atlantic Coast, 585
The chemical and meteorological conditions associated with high and low ozone concentrations in southeastern Michigan and nearby areas of Ontario, 150
Fisher, B. E. A.
The effect of tall stacks on the long range transport of air pollutants, 399
Flocchini, R. G.
Relationships among coefficient of haze, scattering coefficient, and visibility during an agricultural burn season, 173
Forbes, S. L.
Modeling adsorption bed behavior using a microcomputer, 61
Frederick, E. R.
Fibers, filtration and electrostatics: A review of the new technology, 205
Freeman, D. L.
A method for propagating measurement uncertainties through dispersion models, 246
Freeman, H. M.
Treatment technologies for hazardous wastes: Part I. A review of treatment alternatives for dioxin wastes, 67
Fuerst, R. G.
A new audit technique for EPA Method 25, 1342
Fung, K. K.
Monitoring of benzene in ambient air with organic vapor badges, 819
Fung, K. W.
Impact of indoor environmental parameters on formaldehyde concentrations in unoccupied research houses, 1244
Gibson, T. L.
Sources of nitroaromatic mutagens in atmospheric polycyclic organic matter, 1022
Goldstein, P. D.
Critical review of toxic air pollutants—*revisited*, 367
Rationale for an eight-hour ozone standard, 913
Golomb, D.
Seasonal, episodic and targeted control of sulfate deposition, 798
Gorse, R. A., Jr.
1-Nitropyrene in used diesel engine oil, 1255
Grandi, F. Z.
Probability model for atmospheric sulphur dioxide concentrations in the area of Venice, 1028
Graves, M. E.
Application of cluster analysis to aerometric data, 1116
Greenberg, A.
Quality control for noncriteria air pollutants: results from the ATEOS project, 388
Griest, W. H.
Combustion as the principal source of carbonaceous aerosol in the Ohio River Valley, 705
Grosse, D. W.
Treatment technologies for hazardous wastes: Part IV. A review of alternative treatment processes for metal bearing hazardous waste streams, 603
Gschwandtner, G.
Historic emissions of sulfur and nitrogen oxides in the United States from 1900 to 1980, 139
Gschwandtner, K.
Historic emissions of sulfur and nitrogen oxides in the United States from 1900 to 1980, 139
Gunzelman, C. P.
Performance of fabric filters on cyclone fired boilers. The experience at Baltimore Gas and Electric's C. P. Crane station, 316
Haas, C. N.
Recovery, recycle and reuse of hazardous waste, 1163
Hackney, J. D.
Respiratory responses of exercising asthmatic volunteers exposed to sulfuric acid aerosol, 1323
Hair, J. D.
Clean air act: promises and priorities, 1000
Halberstadt, M. L.
MVMA newsletter, 230, 727, 1106
Halitsky, J.
Calculation of σ_z and H an observed vertical profile of concentration, 1357
Hall, D. L.
The viability of using surrogate compounds for monitoring the effectiveness of incineration systems, 179
Hamawi, J. N.
A modification of the Gaussian dispersion equation to accommodate restricted lateral dispersion in deep river valleys, 171
Hanna, S. R.
Evaluation of downwash modifications to the industrial source complex model, 258
Hanrahan, P. L.
Automated chemical mass balance receptor modeling, 1026
Hansen, K. S.
Responses of two deciduous plants to hydrogen fluoride during winter dormancy, 60
Harkov, R.
Quality control for noncriteria air pollutants: results from the ATEOS project, 388
Harvey, R. B., Jr.
A modification of the Gaussian dispersion equation to accommodate restricted lateral dispersion in deep river valleys, 171
Hawthorne, A. R.
Impact of indoor environmental parameters on formaldehyde concentrations in unoccupied research houses, 1244
Hendriks, R. V.
EPA's LIMB development and demonstration program, 432
Hendry, D. W.
Single-stage dewatering of FGD waste. Emerging technology at Plains-Escalante Station, 852
Henry, R. C.
Improved predictions of plume perception with a human visual system model, 1353
Henz, D. J.
Confiring hazardous waste fuels in industrial processes: the business decision, 1192
Herzfeld, D. E.
Direct effects of atmospheric sulfate deposition on vegetation, 813
Heyerdahl, E. K.
Carbonaceous aerosol at urban and rural sites in the United States, 254
Combustion as the principal source of carbonaceous aerosol in the Ohio River Valley, 705
Hinton, D. O.
EPA inhalable particulate network report, 1154
Hirota, Y.
Present state of industrial waste management in Japan, 1364

Projecting future trends in CEM technology, instrumentation, and regulation.

Continuous Emission Monitoring—Advances and Issues

Edited by James A. Jahnke

Over ten years ago performance specification test procedures for continuous emission monitoring systems (CEMS) were promulgated by the U.S. EPA. These performance specifications, in conjunction with new regulations requiring the installation of CEMS on industrial sources, encouraged the development and application of these systems. Today, along with advances in CEMS technology, we see the extension and refinement of the original regulations. This publication reviews progress in the field of continuous emission monitoring and projects future trends in instrumentation and regulation. The experiences of electric utilities and the pulp and paper industry illustrate the growth and maturity of emissions measurement technology. Papers dealing with agency enforcement policies, quality assurance and auditing methods, and alternate strategies round out the transactions. A peer-reviewed publication.

SUBJECT INDEX

Absorption
Application of dry flue gas scrubbing to hazardous waste incineration, 1258
Responses of two deciduous plants to hydrogen fluoride during winter dormancy, 60

Accidental Releases
Use of an equation solver package for quickly estimating source terms, 1256

Accidents
Avoiding and managing environmental damage from major industrial accidents: executive summary of the international conference, 127

Acid Deposition
See also Deposition, Dry Deposition, Acid Precipitation
Emissions trading and acid deposition control: the need for ERC leasing, 574

Acidification
A transition-flow reactor tube for measuring trace gas concentrations, 1228

Acidity
Fog chemistry in an urban midwestern site, 1359
The extent of nonlinearity in the atmospheric chemistry of sulfate formation, 1151

Acid Precipitation
Acid rain and ozone influence mycorrhizal infection in tree seedlings, 724
A critical assessment of existing data bases for acid deposition modeling studies, 48
1986 Air pollution control market forecast, 242
Atmospheric pollution from coal combustion in China, 371
Design and performance of an exposure system for measuring the response of crops to acid rain and gaseous pollutants in the field, 894
Direct effects of atmospheric sulfate deposition on vegetation, 813
1984 NAPAP acid precipitation report notes improved monitoring methods, 79
Ontario environment minister announces "countdown acid rain" cleanup program, 188
Particulate, carbon monoxide, and acid emission factors for residential wood burning stoves, 1012
Spatial and temporal variability of precipitation for selected regions of New York State and relationship to variability in sulfate deposition measurements, 375

Adaptation
Use of energy scenarios in addressing the CO_2 question, 1111

Adsorption
A transition-flow reactor tube for measuring trace gas concentrations, 1228
Modeling adsorption bed behavior using a microcomputer, 61
Treatment technologies for hazardous wastes: Part II. Alternative techniques for managing solvent wastes, 275
Treatment technologies for hazardous wastes: Part III. Treatment technologies for corrosive hazardous wastes, 403

Aeroallergens
Indoor air quality in cold climates: hazards and abatement measures. Summary of an APCA International Specialty Conference, 235

Aerodynamics
Dry deposition of ammonia at environmental concentrations on selected plant species, 1338

Aerometric Data

Telecommunications and the microcomputer, 743
Telecommunications and the microcomputer—II, 833

Mississauga, Ontario
Avoiding and managing environmental damage from major industrial accidents: executive summary of the international conference, 127

Model Evaluation
A critical assessment of existing data bases for acid deposition modeling studies, 48
Evaluation of downwash modifications to the industrial source complex model, 258
KAPPA-G, a non-Gaussian plume dispersion model: description and evaluation against tracer measurements, 592

Modeling
A modification of the Gaussian dispersion equation to accommodate restricted lateral dispersion in deep river valleys, 171
A simple complex-terrain Monte Carlo dispersion code for an instantaneous volume source, 401
Automated chemical mass balance receptor modeling, 1026
Evaluation of downwash modifications to the industrial source complex model, 258
Modeling adsorption bed behavior using a microcomputer, 61
Modeling the effect of ethanol/gasoline blend usage on ozone formation in urban areas, 808

Models
A critical assessment of existing data bases for acid deposition modeling studies, 48
Improved predictions of plume perception with a human visual system model, 1353

Model Validation
Statistical study of air pollutant concentrations via generalized gamma distributions, 1250

Monitoring
An assessment of mercury emissions from the Afton Copper Smelter, British Columbia, Canada, 803
An overview of hazardous/toxic waste incineration, 922
Formaldehyde concentrations inside private residences: a mail-out approach to indoor air monitoring, 698
Meteorological monitoring using sodar for electric utility air quality applications, 1130
Monitoring of benzene in ambient air with organic vapor badges, 819
Rationale for an eight-hour ozone standard, 913
Remote measurement of sulfur dioxide emissions using an ultraviolet light sensitive video system, 42
The characterization of ozone, sulfur dioxide, and nitrogen dioxide for selected monitoring sites in the Federal Republic of Germany, 1329
The viability of using surrogate compounds for monitoring the effectiveness of incineration systems, 179

Mutagenicity
1-Nitropyrene in used diesel engine oil, 1255
Sources of nitroaromatic mutagens in atmospheric polycyclic organic matter, 1022

Mycorrhizae
Acid rain and ozone influence mycorrhizal infection in tree seedlings, 724

National Air Surveillance Network (NASN)
Carbonaceous aerosol at urban and rural sites in the United States, 254

National Ambient Air Quality Standards (NAAQS)
Status of the DOE/GEESI in-duct scrubbing pilot study, 953
The regulation of toxic air pollutants: a critical review, 562
The regulation of toxic air pollutants: critical review discussion papers, 986

Natural Gas
Daily dispatching of natural gas for air quality, 272
Seasonal, episodic and targeted control of sulfate deposition, 798

Netherlands
Rationale for an eight-hour ozone standard, 913

Networks
EPA inhalable particulate network report, 1154
Meteorological monitoring using sodar for electric utility air quality applications, 1130

Neutralization
Treatment technologies for hazardous wastes: Part III. Treatment technologies for corrosive hazardous wastes, 403

New Jersey
Quality control for noncriteria air pollutants: results from the ATEOS project, 388
Rationale for an eight-hour ozone standard, 913
Tree Realty, Inc. v. Department of Treasury; Spill Compensation Fund of New Jersey, 1209

News Focus Department
Action needed to stabilize earth's chemistry, says Worldwatch Institute, 1044
EPA adds 170 sites to final superfund priority list and proposes 45 others, 834
EPA begins assistance program for indoor radon measurement, 414
EPA's hazardous waste implementation strategy takes risk-based decision making approach, 745
International research team to design advanced coal-fired power plants, 290
1984 NAPAP acid precipitation report notes improved monitoring methods, 79
Office of Technology Assessment urges serious reduction of hazardous waste, 1270
Ontario environment minister announces "countdown acid rain" cleanup program, 188
OSHA announces sharp reduction in permissible worker asbestos exposure, 936
OSHA issues special emphasis program to protect hazardous waste site workers, 290
OTA calls ocean incineration an attractive interim option for certain liquid wastes, 1172
Potter tells APCA seminar that clean air act may need changes to deal with 1980s problems, 618
Rand studies factors affecting chemical emissions threatening global ozone depletion, 1378
States can avoid ozone sanctions if sustained progress is demonstrated, 936

New Source Performance Standards (NSPS)
Development of federal air standards to reduce sulfur dioxide emissions from new industrial boilers, 888
Retrofit NO_x control options for coal-fired electric utility power plants, 1294

New York State
Spatial and temporal variability of precipitation for selected regions of New York State and relationship to variability in sulfate deposition measurements, 375

Nitrate Loss
Rapid nitrate loss from PM_{10} filters, 817

Nitric Acid
Characterization of several integrative sampling methods for nitric acid, sulphur dioxide and atmospheric particles, 715

Nitroaromatics
Sources of nitroaromatic mutagens in atmospheric polycyclic organic matter, 1022

Nitrogen Compounds
Effects of operational factors on pollutant emission rates from residential gas appliances, 1233

Nitrogen Dioxide
The characterization of ozone, sulfur dioxide, and nitrogen dioxide for selected monitoring sites in the Federal Republic of Germany, 1329

Nitrogen Oxides
EPA's LIMB development and demonstration program, 432
Historic emissions of sulfur and nitrogen oxides in the United States from 1900 to 1980, 139
Measurements of sulfur oxides, nitrogen oxides, haze and fine particles at a rural site on the Atlantic Coast, 585
Retrofit NO_x control options for coal-fired electric utility power plants, 1294
The chemical and meteorological conditions associated with high and low ozone concentrations in southeastern Michigan and nearby areas of Ontario, 150
The extent of nonlinearity in the atmospheric chemistry of sulfate formation, 1151

Nitrogen Uptake
Acid rain and ozone influence mycorrhizal infection in tree seedlings, 724

Nitropyrene
1-Nitropyrene in used diesel engine oil, 1255

Nonattainment
Report on the Fourteenth APCA Government Affairs Seminar. Clear Air Act—when, how, and what, 685

Noncriteria Pollutants
Quality control for noncriteria air pollutants: results from the ATEOS project, 388

Nonlinearity
The extent of nonlinearity in the atmospheric chemistry of sulfate formation, 1151

Nonmethane Organic Compounds
Cryogenic preconcentration-direct FID method for measurement of ambient NMOC: refinement and comparison with GC speciation, 710
The chemical and meteorological conditions associated with high and low ozone concentrations in southeastern Michigan and nearby areas of Ontario, 150

Nonsolvent Organics
Treatment technologies for hazardous wastes: Part V. A review of treatment alternatives for wastes containing nonsolvent halogenated organics, 728

Nuclear Reactors
Modeling adsorption bed behavior using a microcomputer, 61

Numerical Simulation
Oxygen stratification in industrial boiler stacks, 1238

Occupational Exposure
Chromium analysis at a ferrochrome smelter, a chemical plant and a refractory brick plant, 581

Ocean Incineration
OTA calls ocean incineration an attractive interim option for certain liquid wastes, 1172

Odor Thresholds
Odor thresholds by forced-choice dynamic triangle olfactometry: reproducibility and methods of calculation, 900

Ohio River Valley
Combustion as the principal source of carbonaceous aerosol in the Ohio River Valley, 705

Olfactometry
Odor thresholds by forced-choice dynamic triangle olfactometry: reproducibility and methods of calculation, 900

Ontario, Canada
The chemical and meteorological conditions associated with high and low ozone concentrations in southeastern Michigan and nearby areas of Ontario, 150

Opacity
Improving baghouse performance at the Monticello generating station, 1075

Operation and Maintenance
Maintenance guidelines for FGD systems, 1299
Third Conference on Fabric Filter Technology for Coal-Fired Power Plants, 763
1985 update, operating history and current status of fabric filters in the utility industry, 100

Organic Compounds
A new audit technique for EPA Method 25, 1342
Carbonaceous aerosol at urban and rural sites in the United States, 254
Indoor air quality in cold climates: hazards and abatement measures. Summary of an APCA International Specialty Conference, 235
Quality control for noncriteria air pollutants: results from the ATEOS project, 388
Oxidants
Effects of peroxyacetyl nitrate alone and in combination with ozone in healthy young women, 265
Oxidation
Respiratory responses of exercising asthmatic volunteers exposed to sulfuric acid aerosol, 1323
Thiosulfate as an oxidation inhibitor in flue gas desulfurization processes: a review of R&D results, 1138
Treatment technologies for hazardous wastes: Part II. Alternative techniques for managing solvent wastes, 275
Treatment technologies for hazardous wastes: Part III. Treatment technologies for corrosive hazardous wastes, 403
Oxygen Stratification
Oxygen stratification in industrial boiler stacks, 1238
Ozone
Acid rain and ozone influence mycorrhizal infection in tree seedlings, 724
Comment on long term ozone trends, 271
Comment on "Ten-year ozone trends in California and Texas" (with author's reply), 597, 599
Direct effects of atmospheric sulfate deposition on vegetation, 813
Effects of peroxyacetyl nitrate alone and in combination with ozone in healthy young women, 265
Modeling the effect of ethanol/gasoline blend usage on ozone formation in urban areas, 808
Rand studies factors affecting chemical emissions threatening global ozone depletion, 1378
Rationale for an eight-hour ozone standard, 913
Report on the Fourteenth APCA Government Affairs Seminar. Clear Air Act—when, how, and what, 685
States can avoid ozone sanctions if sustained progress is demonstrated, 936
The characterization of ozone and sulfur dioxide air quality data for assessing possible vegetation effects, 1123
The characterization of ozone, sulfur dioxide, and nitrogen dioxide for selected monitoring sites in the Federal Republic of Germany, 1329
The chemical and meteorological conditions associated with high and low ozone concentrations in southeastern Michigan and nearby areas of Ontario, 150
Paint Surfaces
Fly ash emissions from a power plant and damage to automobile finishes, 821
Particle Characterization
Characteristics of individual particles at a rural site in the Eastern United States, 906
Measurements of sulfur oxides, nitrogen oxides, haze and fine particles at a rural site on the Atlantic Coast, 585
Particle Size Distribution
Chromium analysis at a ferrochrome smelter, a chemical plant and a refractory brick plant, 581
Comments on the comparison of calculated and measured PM_{10} values, 170
Interpretation of selected EPA field data on particulate matter samplers: Rubidoux and Phoenix II, 164
The relationship between PM_{10} and thoracic particle sampling, 383
Particulates
Characterization of several integrative sampling methods for nitric acid, sulphur dioxide and atmospheric particles, 715
Chromium analysis at a ferrochrome smelter, a chemical plant and a refractory brick plant, 581
Comments on the comparison of calculated and measured PM_{10} values, 170
EPA inhalable particulate network report, 1154
Intercomparison of high-volume PM_{10} samplers at a site with high particulate concentrations, 917
Interpretation of selected EPA field data on particulate matter samplers: Rubidoux and Phoenix II, 164
Particulate, carbon monoxide, and acid emission factors for residential wood burning stoves, 1012
Profiles of organic particulate emissions from air pollution sources: status and needs for receptor source apportionment modeling, 17
Rapid nitrate loss from PM_{10} filters, 817
Sources of nitroaromatic mutagens in atmospheric polycyclic organic matter, 1022
Status of the DOE/GEESI in-duct scrubbing pilot study, 953
The relationship between PM_{10} and thoracic particle sampling, 383
Peroxyacetyl Nitrate
Effects of peroxyacetyl nitrate alone and in combination with ozone in healthy young women, 265
Personal Monitoring
Automated data-logging personal exposure monitors for carbon monoxide, 883
Formaldehyde concentrations inside private residences: a mail-out approach to indoor air monitoring, 698
Monitoring of benzene in ambient air with organic vapor badges, 819
Phoenix, Arizona
Comments on the comparison of calculated and measured PM_{10} values, 170
Interpretation of selected EPA field data on particulate matter samplers: Rubidoux and Phoenix II, 164
Photochemical Pollutants
Modeling the effect of ethanol/gasoline blend usage on ozone formation in urban areas, 808
Rationale for an eight-hour ozone standard, 913
The chemical and meteorological conditions associated with high and low ozone concentrations in southeastern Michigan and nearby areas of Ontario, 150
Photolysis
Treatment technologies for hazardous wastes: Part I. A review of treatment alternatives for dioxin wastes, 67
Phytotoxicity
Responses of two deciduous plants to hydrogen fluoride during winter dormancy, 60
Pilot Studies
EPA's LIMB development and demonstration program, 432
Performance of fabric filters on cyclone fired boilers. The experience at Baltimore Gas and Electric's C. P. Crane station, 316
Pilot study of enclosed thermal soil aeration for removal of volatile organic contamination at the McKin Superfund site, 1156
Status of the DOE/GEESI in-duct scrubbing pilot study, 953
Thiosulfate as an oxidation inhibitor in flue gas desulfurization processes: a review of R&D results, 1138
Planning
Avoiding and managing environmental damage from major industrial accidents: executive summary of the international conference, 127
Plants
Dry deposition of ammonia at environmental concentrations on selected plant species, 1338
Plumes
A modification of the Gaussian dispersion equation to accommodate restricted lateral dispersion in deep river valleys, 171
Calculation of σ_z and H an observed vertical profile of concentration, 1357
Improved predictions of plume perception with a human visual system model, 1353
KAPPA-G, a non-Gaussian plume dispersion model: description and evaluation against tracer measurements, 592
Predictions of maximum ground-level H_2S concentrations resulting from two sour gas well blowouts, 1147
PM-10
Comments on the comparison of calculated and measured PM_{10} values, 170
Intercomparison of high-volume PM_{10} samplers at a site with high particulate concentrations, 917
Interpretation of selected EPA field data on particulate matter samplers: Rubidoux and Phoenix II, 164
Measurements of sulfur oxides, nitrogen oxides, haze and fine particles at a rural site on the Atlantic Coast, 585
Rapid nitrate loss from PM_{10} filters, 817
The relationship between PM_{10} and thoracic particle sampling, 383
Policy
Avoiding and managing environmental damage from major industrial accidents: executive summary of the international conference, 127
Critical review of toxic air pollutants—*revisited*, 367
Emissions trading and acid deposition control: the need for ERC leasing, 574

Status of the DOE/GEESI in-duct scrubbing pilot study, 953
The characterization of ozone and sulfur dioxide air quality data for assessing possible vegetation effects, 1123
The characterization of ozone, sulfur dioxide, and nitrogen dioxide for selected monitoring sites in the Federal Republic of Germany, 1329
Sulfur Hexafluoride
KAPPA-G, a non-Gaussian plume dispersion model: description and evaluation against tracer measurements, 592
Sulfuric Acid
Respiratory responses of exercising asthmatic volunteers exposed to sulfuric acid aerosol, 1323
Sulfur Oxides
Atmospheric pollution from coal combustion in China, 371
EPA's LIMB development and demonstration program, 432
Historic emissions of sulfur and nitrogen oxides in the United States from 1900 to 1980, 139
Measurements of sulfur oxides, nitrogen oxides, haze and fine particles at a rural site on the Atlantic Coast, 585
Supercritical Fluids
Treatment technologies for hazardous wastes: Part I. A review of treatment alternatives for dioxin wastes, 67
Superfund
Captive insurance companies and the management of environmental risks, 791
EPA adds 170 sites to final superfund priority list and proposes 45 others, 834
Pilot study of enclosed thermal soil aeration for removal of volatile organic contamination at the McKin Superfund site, 1156
The regulation of toxic air pollutants: a critical review, 562
The regulation of toxic air pollutants: critical review discussion papers, 986
Surface Impoundment
In situ methods to control emissions from surface impoundments and landfills, 1371
Surrogate Compounds
The viability of using surrogate compounds for monitoring the effectiveness of incineration systems, 179
Surveys
A survey of graduate education in hazardous waste management, 1036
Chemical Manufacturers Association 1984 hazardous waste survey, 737
Formaldehyde concentrations inside private residences: a mail-out approach to indoor air monitoring, 698
1985 update, operating history and current status of fabric filters in the utility industry, 100
Synoptic Storm Types
The effect of season and synoptic storm type on precipitation chemistry, 393
Targeted Control
Seasonal, episodic and targeted control of sulfate deposition, 798
Temperature Effects
Impact of indoor environmental parameters on formaldehyde concentrations in unoccupied research houses, 1244
Temporal Variability
Spatial and temporal variability of precipitation for selected regions of New York State and relationship to variability in sulfate deposition measurements, 375
Terrain Effects
Meteorological monitoring using sodar for electric utility air quality applications, 1130
Test Methods
Odor thresholds by forced-choice dynamic triangle olfactometry: reproducibility and methods of calculation, 900
Texas
Comment on "Ten-year ozone trends in California and Texas" (with author's reply), 597, 599
Thermal Destruction
See also Incineration
An overview of hazardous/toxic waste incineration, 922
The viability of using surrogate compounds for monitoring the effectiveness of incineration systems, 179

Thiosulfate
Thiosulfate as an oxidation inhibitor in flue gas desulfurization processes: a review of R&D results, 1138

Thoracic Particle Sampling
The relationship between PM_{10} and thoracic particle sampling, 383

Three Mile Island
Avoiding and managing environmental damage from major industrial accidents: executive summary of the international conference, 127

Tort Topics Department
ALEC announces model state Legislation for tort reform, 1108
Department of Justice working group recommends reform of tort law, 682
Discovery rule, other reforms become law in New York State, 1108
New coalition to address growing liability crisis, 496

Total Suspended Particulate (TSP)
Atmospheric pollution from coal combustion in China, 371
Decline in children's pulmonary function during an air pollution episode, 1223
The relationship between PM_{10} and thoracic particle sampling, 383

Toxic Air Pollutants
Avoiding and managing environmental damage from major industrial accidents: executive summary of the international conference, 127
Critical review of toxic air pollutants—*revisited*, 367
Report on the Fourteenth APCA Government Affairs Seminar. Clear Air Act—when, how, and what, 685
Summary of the 1986 EPA/APCA symposium on measurement of toxic air pollutants, 981
The regulation of toxic air pollutants: a critical review, 562
The regulation of toxic air pollutants: critical review discussion papers, 986

Toxic Substances Control Act (TSCA)
An overview of hazardous/toxic waste incineration, 922
The regulation of toxic air pollutants: a critical review, 562
The regulation of toxic air pollutants: critical review discussion papers, 986

Toxic Waste
An overview of hazardous/toxic waste incineration, 922

Trace Elements
Profiles of organic particulate emissions from air pollution sources: status and needs for receptor source apportionment modeling, 17

Trace Gases
A transition-flow reactor tube for measuring trace gas concentrations, 1228

Tracers
KAPPA-G, a non-Gaussian plume dispersion model: description and evaluation against tracer measurements, 592
Profiles of organic particulate emissions from air pollution sources: status and needs for receptor source apportionment modeling, 17

Transboundary Air Pollution
The chemical and meteorological conditions associated with high and low ozone concentrations in southeastern Michigan and nearby areas of Ontario, 150
The effect of tall stacks on the long range transport of air pollutants, 399

Transport
Dry deposition of ammonia at environmental concentrations on selected plant species, 1338
The chemical and meteorological conditions associated with high and low ozone concentrations in southeastern Michigan and nearby areas of Ontario, 150
The effect of tall stacks on the long range transport of air pollutants, 399

Treatment, Storage and Disposal
Field evaluation of hazardous waste pretreatment as an air pollution control technique, 1264

Trees
Severity of SO_2-induced leaf necrosis on Caribbean, Scots, and Virginia pine seedlings, 1019

Trends
Chemical Manufacturers Association 1984 hazardous waste survey, 737
Comment on long term ozone trends, 271
Comment on "Ten-year ozone trends in California and Texas" (with author's reply), 597, 599
Historic emissions of sulfur and nitrogen oxides in the United States from 1900 to 1980, 139
Use of energy scenarios in addressing the CO_2 question, 1111

Trichloroethylene
Pilot study of enclosed thermal soil aeration for removal of volatile organic contamination at the McKin Superfund site, 1156

Trichlorofluoromethane
The release of trichlorofluoromethane from rigid polyurethane foams, 159

Ultraviolet Light
Remote measurement of sulfur dioxide emissions using an ultraviolet light sensitive video system, 42

Uncertainties
A method for propagating measurement uncertainties through dispersion models, 246

United States
1986 APCA Government Agencies Directory, 445

Unplanned Releases
Avoiding and managing environmental damage from major industrial accidents: executive summary of the international conference, 127

Urban Pollutant
Carbonaceous aerosol at urban and rural sites in the United States, 254

Urban Pollution
Profiles of organic particulate emissions from air pollution sources: status and needs for receptor source apportionment modeling, 17

Urban Problems
Evaluation of downwash modifications to the industrial source complex model, 258
Fog chemistry in an urban midwestern site, 1359
Modeling the effect of ethanol/gasoline blend usage on ozone formation in urban areas, 808

Urea-Formaldehyde
See Formaldehyde

Utility Industry

Emissions trading and acid deposition control: the need for ERC leasing, 574
EPA's LIMB development and demonstration program, 432
Integrated environmental control in the electric utility industry, 652
Maintenance guidelines for FGD systems, 1299
Meteorological monitoring using sodar for electric utility air quality applications, 1130
Retrofit NO_x control options for coal-fired electric utility power plants, 1294
Single-stage dewatering of FGD waste. Emerging technology at Plains-Escalante Station, 852
Third Conference on Fabric Filter Technology for Coal-Fired Power Plants, 763
1985 update, general history and current status of fabric filters in the utility industry, 100

Vapor Badges
Monitoring of benzene in ambient air with organic vapor badges, 819

Vegetation Effects
Acid rain and ozone influence mycorrhizal infection in tree seedlings, 724
An assessment of mercury emissions from the Afton Copper Smelter, British Columbia, Canada, 803
Design and performance of an exposure system for measuring the response of crops to acid rain and gaseous pollutants in the field, 894
Direct effects of atmospheric sulfate deposition on vegetation, 813
Dry deposition of ammonia at environmental concentrations on selected plant species, 1338
Responses of two deciduous plants to hydrogen fluoride during winter dormancy, 60
Severity of SO_2-induced leaf necrosis on Caribbean, Scots, and Virginia pine seedlings, 1019
The characterization of ozone and sulfur dioxide air quality data for assessing possible vegetation effects, 1123
The characterization of ozone, sulfur dioxide, and nitrogen dioxide for selected monitoring sites in the Federal Republic of Germany, 1329

Vendors
Product guide/1986, 333

Ventilation
Impact of indoor environmental parameters on formaldehyde concentrations in unoccupied research houses, 1244
Indoor air quality in cold climates: hazards and abatement measures. Summary of an APCA International Specialty Conference, 235

Vertical Mixing
A modification of the Gaussian dispersion equation to accommodate restricted lateral dispersion in deep river valleys, 171
Calculation of σ_z and H an observed vertical profile of concentration, 1357

Video System
Remote measurement of sulfur dioxide emissions using an ultraviolet light sensitive video system, 42

Visibility
Improved predictions of plume perception with a human visual system model, 1353
Relationships among coefficient of haze, scattering coefficient, and visibility during an agricultural burn season, 173

Visual Resources
Improved predictions of plume perception with a human visual system model, 1353

Volatile Organic Compounds (VOC)
Field evaluation of hazardous waste pretreatment as an air pollution control technique, 1264
Pilot study of enclosed thermal soil aeration for removal of volatile organic contamination at the McKin Superfund site, 1156
VOC emission controls for can end sealing compounds: a case history, 1397

Waste Characterization
Treatment technologies for hazardous wastes: Part I. A review of treatment alternatives for dioxin wastes, 67
Treatment technologies for hazardous wastes: Part IV. A review of alternative treatment processes for metal bearing hazardous waste streams, 603

Waste Disposal
Treatment technologies for hazardous wastes: Part III. Treatment technologies for corrosive hazardous wastes, 403
Treatment technologies for hazardous wastes: Part IV. A review of alternative treatment processes for metal bearing hazardous waste streams, 603
United States of America v. Reilly Tar and Chemical Corporation, 444

Waste Exchange
Recovery, recycle and reuse of hazardous waste, 1163

Waste Treatment
